**Amendment of My Claims**

Dear Madam/Sir,

I filed a patent application in your offices, INTEGRATED DATABASE DATA EDITING SYSTEM, Application #09/677,493, Filing Date: 10/02/2002. I recently received a letter from **Baoquoc N. To** dated July 27, 2002 regarding to the Claims 1-6 pending and rejection. I have carefully reviewed Mr. To's DETAILED ACTION and the reference, and concluded that my patent application and the Claims are totally different from that of **Scott et al U.S. Patent No. 5,675,752**. I had a phone conversation with Mr. To on August 6, 2002 and I have reviewed my patent application.

**Scott et al.** teaches an interactive applications generator utilized to generate an interactive application environment for use on a single server multi-client network computer system. For example, an airplane passenger entertainment system. **Scott et al.** did not use any computer database and did not edit the database.

My invention relates to the integrated database data editing system that is used to remotely edit and manage the computer relational database data contents through computer networks such as intranet or Internet. The data editor in my invention is related to the totally different entities than that of **Scott et al.** The computer mouse "single-click" and "double-click" are the standard operations of the mouse. The functions of these mouse operations in my invention are also different from that of **Scott et al.**

Attached is my reviewed Patent Application. I naturalized as a U.S. Citizen in December 2001 and changed my name Guang Yang to George Guang Yang (see the attached document). Please direct to my new name and new address for later contact.

Sincerely,

  
George Guang Yang
